$$f : x = y^2$$

$$g : x = 6 - y - y^2$$

snijpunten bepalen

$$-2y^2 - y + 6 = 0 \rightarrow y = \frac{1 \pm 7}{4} = -2 \text{ of } \frac{3}{2}$$

$$\int_{-2}^{\frac{3}{2}} -2y^2 - y + 6 \cdot dy = \left[-2\frac{y^3}{3} - \frac{y^2}{2} + 6y \right]_{-2}^{\frac{3}{2}} = \frac{45}{8} + \frac{26}{3}$$
$$= \frac{343}{24}$$
