Oefeningenreeks 6B nr. 1.4

$$7a + 6 - (6a + 4) = a + 2$$

$$6a + 4 - (5a + 2) = a + 2$$

$\Rightarrow$ Rekenkundige rij

$$\begin{aligned} s_{11} &= \frac{11(x_1 + x_{11})}{2} \\ &= \frac{11((5a + 2) + (x_1 + 10v))}{2} \\ &= \frac{11(5a + 2 + (5a + 2) + 10(a + 2))}{2} \\ &= \frac{11(10a + 4 + 10a + 20)}{2} \\ &= 11(5a + 2 + 5a + 10) \\ &= 110a + 132 \end{aligned}$$
