$$x_n = (\sqrt{n^2 + 3n}) - n$$

$$\lim_{n \rightarrow \infty} x_n = +\infty - \infty$$

$$= \lim_{n \rightarrow \infty} \frac{3n}{n + n} = \frac{3}{2}$$

$$\text{adh } x_n = \left\{ \frac{3}{2} \right\}$$

$$\limsup_{n \rightarrow +\infty} x_n = \frac{3}{2}$$

$$\liminf_{n \rightarrow +\infty} x_n = \frac{3}{2}$$
