$$\sum_{n=2}^{\infty} \frac{n \sin\left(\frac{1}{n}\right)}{\left(\frac{1}{n} + 5\right)}$$

criterium 1: $\lim_{n \rightarrow +\infty} x_n \neq 0$

$$\begin{aligned} &= \lim_{n \rightarrow +\infty} \frac{n \sin\left(\frac{1}{n}\right)}{\left(\frac{1}{n} + 5\right)} \\ &= \lim_{n \rightarrow +\infty} \frac{n \sin\left(\frac{1}{n}\right) \left(\frac{1}{n}\right)}{\left(\frac{1}{n} + 5\right) \left(\frac{1}{n}\right)} \\ &= \lim_{n \rightarrow +\infty} \frac{1}{\left(\frac{1}{n} + 5\right)} = \frac{1}{5} \Rightarrow \text{divergent} \end{aligned}$$
