$$\sum_{n=0}^{\infty} \frac{5^n}{2^n}$$

$$\begin{aligned} \text{Cauchy: } L &= \lim_{n \rightarrow +\infty} \sqrt[n]{x_n} = \lim_{n \rightarrow +\infty} \sqrt[n]{\left(\frac{5}{2}\right)^n} \\ &= \frac{5}{2} > 1 \Rightarrow \text{Divergent} \end{aligned}$$
