$$f(x, y) = \sqrt{x^2 + y^2}$$

$$a(1, 0) \text{ en } h\left(\frac{2\sqrt{5}}{5}, \frac{\sqrt{5}}{5}\right).$$

$$\begin{cases} \frac{\partial f}{\partial x}(x, y) = \frac{2x}{2\sqrt{x^2 + y^2}} = \frac{x}{\sqrt{x^2 + y^2}} \\ \frac{\partial f}{\partial y}(x, y) = \frac{2y}{2\sqrt{x^2 + y^2}} = \frac{y}{\sqrt{x^2 + y^2}} \end{cases} \Rightarrow \begin{cases} \frac{\partial f}{\partial x}(1, 0) = \frac{1}{\sqrt{1^2 + 0^2}} = 1 \\ \frac{\partial f}{\partial y}(1, 0) = \frac{0}{\sqrt{1^2 + 0^2}} = 0 \end{cases}$$

$$\Rightarrow Df(a, h) = \begin{pmatrix} 1 & 0 \end{pmatrix} \begin{pmatrix} \frac{2\sqrt{5}}{5} \\ \frac{\sqrt{5}}{5} \end{pmatrix} = \frac{2\sqrt{5}}{5}$$
