Oefeningenreeks 7A nr. 5.1

$$x_4 = 189 \text{ en } x_6 = 1701$$

$$\begin{cases} 189 = x_1 \cdot q^3 \\ 1701 = x_1 \cdot q^5 \end{cases}$$

$$\frac{189}{q^3} = \frac{1701}{q^5}$$

$$q = 3 \text{ dan } x_1 = 7$$

of

$$q = -3 \text{ dan } x_1 = -7$$
